企业介绍

海道教育（HD EDU）成立于2018年，是一家助力国际化人才成长的教育科技企业，同时也是一个力求突破语言和文化障碍、推动国际教育与文化属性相融合的新锐品牌。

海道教育已实现全球规模化发展，旗下产品已走入英国、美国、澳大利亚、新西兰等主流留学的国家40多所院校，为超30万的中国留学生提供高品质的教学服务，成为留学后市场在线教育的领军企业。

2022年，HD EDU发布首个学术诚信合规准则，HD EDU愿始终与所有用户一起，坚守学术尊严，真正意义上打造既保护用户权益又懂用户需求的教学产品，推动海外华人留学生成长与发展。

产品介绍

成立五年来，HD EDU 作为专注于留学后市场服务的后起之秀，秉持着“提升中国留学生核心竞争力”的产品理念，深度洞察留学生教育场景叠加、需求变化，研发多阶段教育产品，为用户提供多元化、高品质的一站式留学教育服务，打造出符合留学生全生命周期的三大教育产品线：HD Tutoring、HD Career、HD Offer。

HD Tutoring

学习有海道，提分更有效

节点辅导

全学期学业辅导

HD Career

让年轻人找到喜欢的工作

技能课程

资格证书

实训项目

求职方案

HD Offer

专注藤校G5级别院校申请

选校定位

文书创作

申请服务

面试辅导

以用户的成长为第一

同学们 有问题 怎么办?

- 1.点【参会者】
- 2.点【举手】即可与老师实时互动
- 3.问题被解答了还可以【手放下】
- 4.点【聊天】/【Chat】就可以与老师实时文字互动哦

学科特点及学习方法

学科特点：

1. 聚焦于科学与社会的实际互动，从多个科学领域汲取案例，重点放在健康科学、生物多样性、气候变化与环境挑战，**知识跨度大**
2. **知识分散细碎**，需要形成**知识点框架**，熟悉知识点之间的联系，在记住必背知识的前提下，理解知识
3. 上半学期Nature of Scientific Knowledge知识点偏于**理论**，下半续学期Plural Knowledge Systems 知识点偏于**实际案例**，需要理解理论的应用过程，能够将知识点为实际案例分析服务

学习方法：

1. 每周及时整理笔记，按照知识框架定期复习理解
2. 注意知识的重点分布，学会举一反三，切忌死记硬背
3. 注意积累reference，关注前沿性新闻/发现

全学期目录

科学与知识的本质

W1: Introduction

W2: The Ethos of Objectivity

W3: Facts and norms

W4: Norms and artefacts

科学知识本身特点
与建构机制

科学与社会的共构

W5: Co-production

W6: Science and climate justice

W7: Science and cultural authority

科学与社会在互动
中形成的双向影响

多元知识体系的交汇

W8: Place-based knowledge

W9: Knowledge and heritage

W10: Science and Indigenous knowledges

W11: Relating knowledge systems

挑战“西方科学中心
主义”的视角，强调
科学与其他知识体系
之间的对话与冲突

转变中的科学实践

W12: Transforming research practice

W13: Conclusion

社会责任与伦理挑战

W1: Introduction

W2: The Ethos of Objectivity

W3: Facts and norms

W4: Norms and artefacts

W5: Co-production

W6: Science and climate justice

W7: Science and cultural authority

W8: Place-based knowledge

W9: Knowledge and heritage

W10: Science and Indigenous knowledges

W11: Relating knowledge systems

W12: Transforming research practice

W13: Conclusion

考情分析

Assessment	%	Duration	
Written work	20	Critical Analysis of assigned reading	Week 6
Written work	20	Revision of critical analysis of assigned reading	Week 9
Weekly quiz response	30	Online Quiz on Lectures and Reading	
Final exam	30	Written exam	

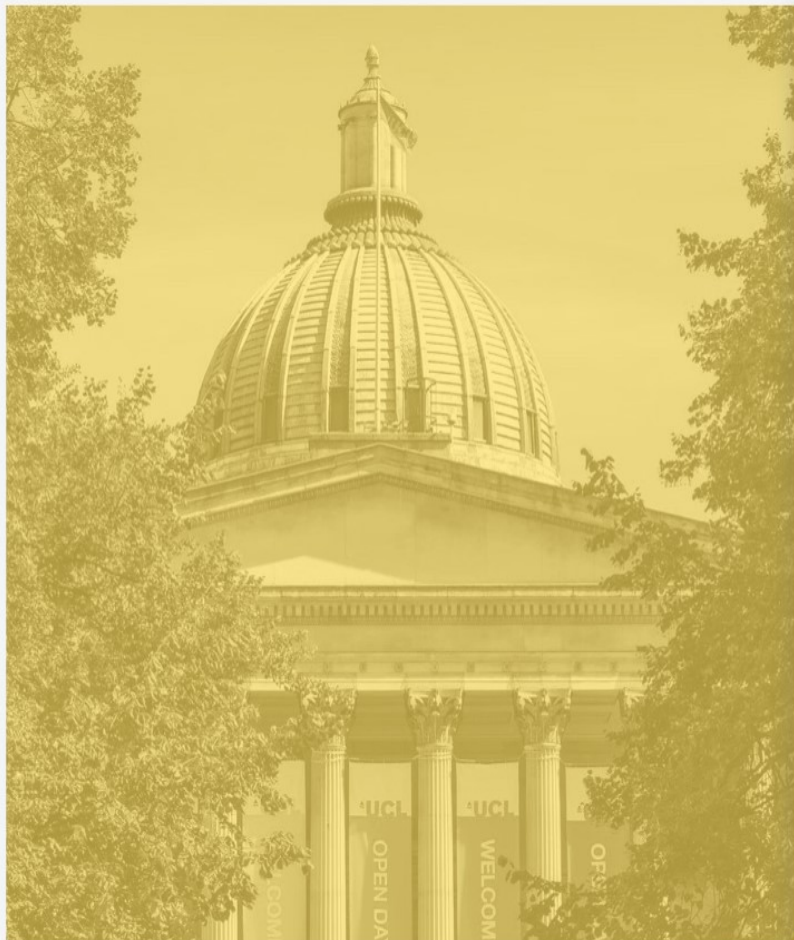

本章知识点

Week1. Introduction

知识点1 Science, Ethics and Society ★ ★ ★

知识点2 David Hume ★ ★ ★ ★

知识点讲解

考点1. Science, Ethics and Society

重要程度: ★★★★★

难易程度: ★★

1. Context 背景: Science and technology are an integral part of our societies today. 科学、伦理与科学技术是当今社会不可或缺的重要组成部分

2. Issues 问题: 诸多伦理与道德问题 Many ethical and moral questions and problems

3. Ideas 核心观点:

- Science and technology enables us to do new stuff, and we need to figure out what is right and wrong, or what is more or less desirable given a set of norms or values. 科学技术使我们能够从事新的活动，我们需要在既定的规范或价值观体系下，厘清何为正确与错误，或何为更可取与不可取
- **Science is done by people 科学是由人来构建:**
 - what are the relations between that process and ethical, normative, moral questions? 与伦理、规范、道德问题 > **权力与价值的交织** > 社会学认为科学不是完全客观、中立的知识体系，而是一种**社会建构**

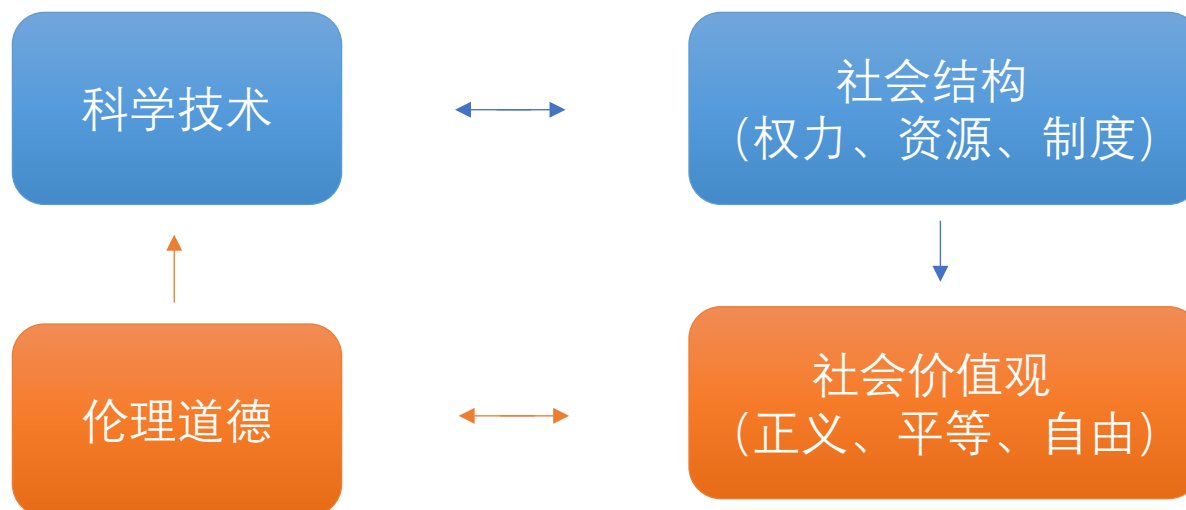

考点1. Science, Ethics and Society

重要程度: ★★★★★
难易程度: ★★

3. Ideas 核心观点:

➤ Science is done by people 科学是由人来构建:

- How does knowing stuff through science relate to acts of valuation? 通过科学获取知识与价值判断行为之间有何关联 > 科学带来技术可能, 但**社会决定的伦理问题**
- To questions of justice, equality, freedom, or rights? 与正义、平等、自由或权利等问题> 科技成果的分配, 科技是否加剧了社会不平等等等问题

考点2. David Hume

重要程度: ★★★★★
难易程度: ★★★★★

David Hume 大卫·休谟 (1711-1776)

Scottish Enlightenment philosopher 苏格兰启蒙运动哲学家

1. *A Treatise of Human Nature*(1739) 人性论:

- **成就:** An Attempt to Introduce the Experimental Method of Reasoning into Moral Subjects 论将实验方法引入道德领域
- **论点famous claims:**
our **causal beliefs** reflect a **habit of pattern-based association**, not a principle of nature. 我们的因果信念反映了一种基于模式的联想习惯，而非自然法则

2. is-ought problem “是”与“应当”问题

评价: 哲学史上极为重要的问题

考点2. David Hume

重要程度: ★★★★★

难易程度: ★★★

2. is-ought problem “是”与“应当”问题

原文摘录:

In every system of morality 在许多道德体系中...

原始表达: 作者一开始用‘是’ (is) 或‘不是’ (is not) 来**陈述事实**

陈述内容: the author proceeds for some time in the ordinary way of reasoning, and establishes the being of a God, or makes observations concerning human affairs; 上帝的存在、人类行为的描述等等

➤ **转变:** 人**应该 (ought)** 如何, 或**不应该**如何, 却没有说明他是**如何从事实判断跳转到价值判断**的。

➤ **举例:**

科学发现: AI可以预测一个人是否可能犯罪 (is)

伦理讨论: 我们**应该**用AI决定是否提前拘捕某人吗? (ought)

考点2. David Hume

重要程度: ★★★★★
难易程度: ★★★★★

2. is-ought problem “是”与“应当”问题

原文摘录:

论点陈述: This change is **imperceptible**; but is, however, of **the last consequence**. 很多论证会在不自觉中从**描述事实 (is)** 跳到**规范结论 (ought)**，这种跳跃常常**察觉不到却十分重要**

论点解释: For as this ought, or ought not, expresses some **new relation or affirmation**, 'tis necessary that it should be observed and explained; 应当/不应当表达了一种**新的关系或断言**，因此有必要对其进行观察和解释 》例如：责任、义务、价值、禁止等

要求: and at the same time that **a reason should be given**, for what seems altogether inconceivable, how this new relation can be a deduction from others, which are entirely different from it.

必须给出一个理由：解释为何这种看似完全不可思议的新关系，能够从与它完全不同的其他关系中推导出来 》**logical consistency 逻辑严谨性**

考点2. David Hume

重要程度: ★★★★★
难易程度: ★★★★★

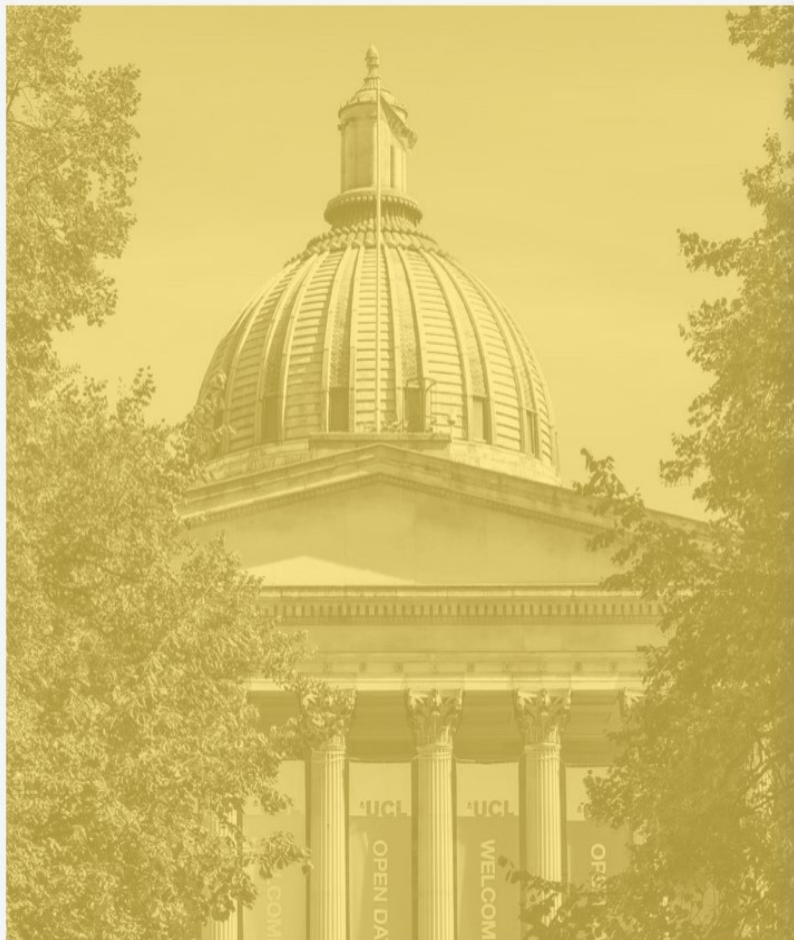

3. Views of is-ought problem “是”-“应当”问题 两种主要立场

◆ non-naturalistic非自然主义立场

- 观点: 没有办法从 is 推出 ought
- 理由: moral philosophy道德哲学 is autonomous from the natural sciences自然科学
道德领域 (ought) 是独立于自然科学 (is) 的, 二者相互独立, 不能直接推导
- 延伸: 任何试图直接用事实证明道德结论的论证, 都犯了“跨越 is/ought 界限”的逻辑错误
- 代表思想: 康德伦理学

◆ naturalistic自然主义立场

- 观点: 有办法从 is 到 ought
- 理由: the truth value of moral truths relates to facts about physical reality.
道德真理的真值 依赖于世界的客观事实 (比如生物学、心理学、社会学中的事实)
- 代表思想: 功利主义 (功利是客观可测的)

重难点总结

重难点总结

Week1. Introduction

- 1. Science, Ethics and Society
 - 1. Context
 - 2. Issues
 - 3. Ideas
- 2. David Hume
 - 1. A Treatise of Human Nature
 - 2. Is-ought problem
 - 3. Views of is-ought problem

1. Science, Ethics and Society

- 科学是由人来构建：科学的构建属性，与社会的相互影响。
- 对应case进行解释，在essay作业与final中需要将其转化为你的论述角度

2. David Hume

- 著作内容概述
- Is-ought problem: “是”变成“应当”的逻辑严谨性问题
- 解释两种不同的看待Is-ought problem立场，对应具体案例

本章知识点

W2: The Ethos of Objectivity

- The natural and the moral**

考点1. Concept of natural and the moral

重要程度: ★★★★★
难易程度: ★★

1. Hume's is/ought “是”/“应当”distinction to the 'naturalistic fallacy' 自然谬误

出处: *A Treatise of Human Nature* (1739) 人性论

内容: Hume problematises the derivation of propositions expressing obligation (what ought to be) from factual premises (what is) 质疑了从事实前提推导出表达义务命题的合理性
》在陈述事实 what is 的命题与陈述义务/规范 what ought to be 之间存在一种逻辑跳跃

2. 'Naturalistic fallacy' 自然主义谬误

出处: G. E. Moore 在 *Principia Ethica* (1903) 广泛推广

核心: “开放问题论证” open-question argument: 把“好”直接还原为某种自然属性通常是一种哲学错误或概念上的偷换 》把价值偷换为事实

两大观点: 非自然主义 ethical non-naturalism & 自然主义 ethical naturalism

方式: Naturalisation 自然化

➤ appeal to 'nature' to represent norms 援引“自然”来代表规范

考点1. Concept of natural and the moral

重要程度: ★★★★★
难易程度: ★★

3. Daston, The Naturalistic Fallacy Is Modern, 579 (Isis, 2014)

核心观点: 自然谬误是现代的

摘录:

The naturalistic fallacy appears to be **ubiquitous and irresistible** 自然主义谬误无处不在且不可抗拒

- 诉诸“自然”作为道德、政治或审美正当性的做法在人类历史上非常古老、普遍存在:

Nature's authority has been enlisted by reactionaries and by revolutionaries, by the devout and secular alike. 不同政治力量都会“征召”自然这一定义资源, 把它当作正当化工具》“自然”作为正当性资源是跨意识形态的通用工具, 而不是某一派专属

In various dispersed traditions, nature has been upheld as the pattern of all values: the Good, the True, and the Beautiful. 当自然被宣称为“Good/True/Beautiful”的模式时, 它就超越了描述性角色, 承担了规范性、认知性与审美性的职能》“自然谬误”的公共文化形式: 把“就是如此”descriptive等同于“应当如此/应被赞许”normative/evaluative

- 但以“自然谬误”**naturalistic fallacy**这一逻辑—哲学的方式去批评它, 却是近代以来特有的
Yet a closer look at the history of the term "naturalistic fallacy" and its associated arguments suggests that this way of understanding (and criticizing) appeals to nature's authority in human affairs is of **relatively modern origin**.
own assumptions about the **natural and the human**. 它植根于现代人对自然与人类的特定假设》只有当“自然”被现代科学、世俗理性重新定义为客观的、非人格的、外在的实体之后, “从自然推导规范”才会被视为一种逻辑错误

考点2. Pre-modern versus modern nature(s)

重要程度: ★★★★★

难易程度: ★★

Pre-modern versus modern 'nature(s)' 前现代自然的多重含义 —— Daston, 'Naturalistic Fallacy', 583

➤ A millefeuille千层酥结构

1. **Aristotle's specific natures** 亚里士多德: what makes a thing **that** thing “自然”不是一种普遍的物质状态，而是每个事物内在的**本性physis/目的telos** 》“遵循自然”并非诉诸外在事实，而是**顺从事物固有的存在逻辑**
 案例：种子的“自然”是成长为植物，马的“自然”是奔跑 》“自然”即**本质 + 目的**
2. **Nature as justice** “自然”与“正义”相连: grounded in **ontology本体论** of specific natures 正义意味着每个事物/人做其“本分”，符合其自然 》“自然”既规定“是什么”，也规定“应当是什么”
 案例：Plato's Republic 柏拉图《理想国》
3. **Nature as the will of god** 自然即神意: the unnatural becomes a moral category “反自然”成为道德范畴 》以“自然或不自然”来判断罪与德，“自然”不只是物理世界，而是**神圣秩序的可见表达**
 案例：Latin Christianity 拉丁基督教: **lex naturalis** 自然法
4. **Nature as aspiration** 自然即向往: natural and universal law construed as “divine edicts” 普遍理性或神圣法令 》“自然理性”揭示“应当”的普遍原则，从自然到理性的转化

考点3. Modern 'nature'

重要程度: ★★★★★

难易程度: ★★★

1. 转化

时间: From mid-nineteenth century 19 世纪中叶以后

背景: 工业化、机械哲学与社会达尔文主义的兴起

2. 特点:

- nature as rule by **physical necessity** 自然作为物理必然性的统治》自然的运作被重新定义为无目的的必然性，自然的必然性》自然不再提供“指导”或“意义”；它只是“运作”
- disassociated from **values or guidance** 脱离价值或指引: “the natural and the moral belong to different ontological categories” 自然与道德属于不同的本体论范畴》人类价值、道德或意义则成为完全不同的范畴》自然 = 事实领域；道德 = 人类精神领域
》从“自然有德”到“自然无德”，休谟“is/ought distinction”在历史现实中的完成形态
- **nature and its human complements**: relation of competition rather than collaboration “自然”与“人”不再共属一个秩序，而成为相互竞争的对立面
- **no escape from the dictates of nature** 无法逃脱自然的法则: inevitability and universality as common features of political and social theories grounded in this new understanding of nature 必然性与普遍性成为基于这种新自然观的政治社会理论的共同特征》体现了现代“自然”的两面性: 价值被排除出自然，但人们又借自然之名赋予制度以必然性

考点3. Modern 'nature'

重要程度: ★★★★★

难易程度: ★★★

3. 案例

- 蒸汽机的图像steam engine

Original drawing of James Watt's 1788 (Science Museum, London)

解析: 象征着“自然规律的可驯化机制化”, 人类将自然力量转化为可预测、可控制的物理过程

》自然 = 能被技术化的必然性系统

4. Moore 与 Frankena: 伦理领域的对应转折

Moore 的论点: “ethical characteristics are different in kind from non-ethical ones”伦理特征与非伦理特征本质不同 》善”“应当”等伦理特征与“快乐”“进化”“幸福”“生理健康”等自然属性不属于同一范畴

核心观点: 自然与道德属于不同种类different in kind, 不能相互化约

G. E. Moore's naturalistic fallacy (1903) as read by W. Frankena:

重难点总结

Week2. The natural and the moral

1. Concept of natural and the moral

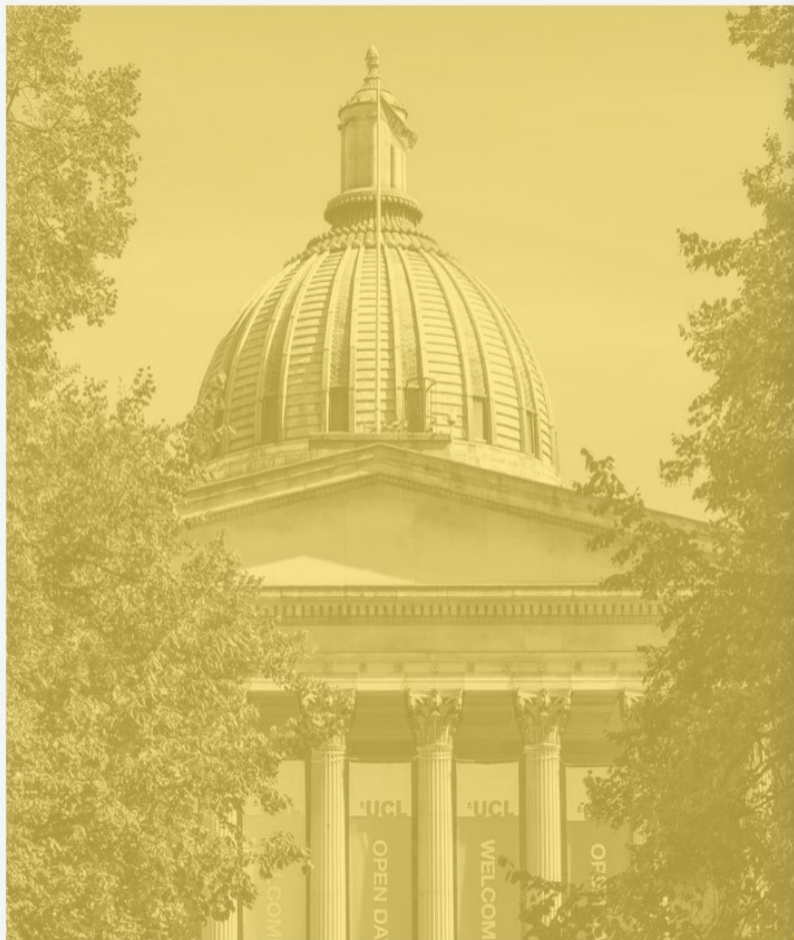

- 1. Hume's
- 2. 'Naturalistic fallacy'
- 3. Daston

2. Pre-modern versus modern nature

- 1. 转化
- 2. 特点

3. Modern 'nature

- 3. 案例
- 4. Moore & Frankena的对应转折

重难点总结

本章知识点

W3: Facts and norms

考点1. Visions of nature

重要程度: ★★★★★
难易程度: ★★

1. 自然观的历史变迁 Historical change in visions of nature.

- from source of **normative guidance** - 古典与中世纪传统: 具有规范意义的秩序 “what ought to be”
- to **economic resource** - 近代早期: 经验研究与事实的来源 > 自然成为“资源”, 是可以被测量、实验
- 结果: Nature as 'what just is' as opposed to its human complements: **precondition for 'naturalistic fallacy'** 导致了“自然主义谬误”的问题: **不能从自然事实推出道德应然**
- **17th-century new natural philosophy 新自然哲学**: the experimental production of facts 实验性事实的生成
实验实践: 事实不是“自然自己说话”, 而是通过实验室、仪器、方法, 被生产出来的
- ◆ **自然主义谬误与事实/自然的分裂 “Matters of fact have nothing to do with nature.”**
Daston, ‘Naturalistic Fallacy,’ 586. 》事实与自然脱钩 → 事实并不等于“自然本身”, 而是被社会/实验/方法所建构

考点1. Visions of nature

重要程度: ★★★★★
难易程度: ★★

1. 自然观的历史变迁 Historical change in visions of nature.

◆ Steven Shapin and Simon Schather: 事实的坚固性与社会性

事实的坚固性

"In the convention of the intellectual world we now inhabit there is no item of **knowledge so solid as a matter of fact.**

我们可以推翻理论，但事实被认为“坚不可摧”。如果某个所谓“事实”被推翻，那它被重新界定为“根本不是真正的事实”。这使得“事实”类别本身越来越稳固。

事实的社会生产

Human agents make theories and interpretations, and human agents may therefore unmake them. But matters of fact are regarded as the very **"mirror of nature."**

人类能制造理论，但不能制造“事实”。这种观念支撑了事实的权威

Steven Shapin and Simon Schather, Leviathan and the Air-Panty (2011 [1985]) 23

考点1. Visions of nature

重要程度: ★★★★★

难易程度: ★★

2. The eighteenth-century figure of the virtuous scientist “贤明科学家”> 道德与知识的合一者

背景: Joseph Priestley, 发现“新型空气”（氧气，但与Lavoisier有优先权之争）

核心观念 **Joseph Priestley, 1775:**

"A Philosopher ought to be something greater, and better than another man....科学家不仅是实验者，更是道德榜样

the contemplation of the **works of God** should give sublimity to his virtue, should expand his benevolence, extinguish every thing mean, base, and selfish in [his]

nature." **研究自然**（“上帝的作品”）被看作是提升品格、扩展仁爱、消除私欲的途径

时代精神: 18世纪启蒙时代: 科学与道德并不分离

3. 19世纪: 科学与“如何生活”的分离 None of scientists' business

背景: 19世纪科学专业化、制度化。科学的定义发生转变: 科学致力于 **事实、自然规律、可量化的知识**。价值、伦理、生活方式问题 → 逐渐被排除在科学的范畴之外

考点1. Visions of nature

重要程度: ★★★★★
难易程度: ★★

3. 19世纪: 科学与“如何生活”的分离 None of scientists' business

Tolstoy的批评:

普通人期待科学告诉他“如何生活”(伦理、家庭、信仰、情感)
但现代科学只给出“事实性知识”(距离、数据、实验结果)
科学在“人生指导”方面失去了权威。

But what does our science say to him on these matters? It triumphantly tells him how many million miles it is from the earth to the sun. "But I don't want any of those things," says a plain and reasonable man - "I want to know how to live." Leo Tolstoy, 'Modern Science, 1898

◆ 核心转折:

18世纪: 科学与美德、生活指导相连

19世纪: 科学自我限定为“价值中立”, 伦理和规范退到哲学、宗教或文学的领域
自然主义谬误 > 科学事实 (is) ≠ 道德应然 (ought)

考点2. Scientists claims

重要程度: ★★★★★
难易程度: ★★

1. Max Weber: 'Science as a profession and vocation' (1917):

论述内容: meaning and practice of science 科学意义与实践:

- 科学是什么

"What is the vocation of science within the totality of human life? And what is its value? Here, the contrast between past and present is immense. 科学在整个人类生活中的使命是什么? 它的价值是什么? 这两个问题在现代与过去相比差别极大

- 不能做什么

"It simply is an indisputable fact that science does not give that answer to the question [of what we should do and how we should live. 科学无法回答‘我们应该做什么以及如何生活

- 能做什么

"the intellectual honesty to recognise that the **problem of establishing facts, demonstrating what is true** in mathematics or logic, or uncovering the internal structure of cultural values is entirely heterogenous from the problem of furnishing an answer to the question of what is the value of culture and of its individual elements, and how one should accordingly act within the the cultural community and political groupings."给出关于事实与因果的知识, 以及手段-结果的清晰化: 确立事实、证明数学或逻辑中的真理, 或揭示文化价值的内在结构

考点2. Scientists claims

重要程度: ★★★★★

难易程度: ★★

1. Max Weber: *'Science as a profession and vocation' (1917):*

要求:

- A **definition of science** and its proper practice 要给出一个关于科学的严格定义（科学是事实澄清的事业，不是价值判断的来源），并据此界定科学应当如何被正确地实践
- Against moves from evolutionary is to social and political ought 反对从“进化的 is”推导“社会/政治的 ought”

Max Weber by David Levine in the New York Review of book

考点2. Scientists clams

重要程度: ★★★★★

难易程度: ★★

2. Albert Einstein: 20th-century **disengagement from the moral domain** 科学与道德领域的分离 - *'The laws of science and the laws of ethics,' 1950*

科学定义: "Science searches for **relations** which are thought to exist independently of the searching individual. 科学研究的对象是人与人无关的规律性关系> 自然法则、因果关系

特征:

only "being," but no wishing, no valuing, no good, no evil; no goal. 在科学的逻辑里, 只有“存在/事实”, 没有“愿望/价值/善恶/目的”

局限:

As long as we remain within the realm of science proper, we can never meet with a sentence of the type: "Thou shalt not lie." 科学语境中不可能产生“你应当如何”的句子

思想逻辑: 对“自然主义谬误”的再确认: 不能从自然事实推出道德义务

There is something like a Puritan's restraint in the scientist who seeks truth: he keeps away from everything voluntaristic or emotional. [...] Scientific statements of facts and relations, indeed, cannot produce ethical directives." 科学虽然能告诉我们世界是什么样的, 但不能告诉我们我们应当如何生活

考点2. Scientists clams

重要程度: ★★★★★

难易程度: ★★

3. W. E. B. DuBois (1868-1963)

Dusk of Dawn: an Essay toward an Autobiography of a Race Concept (1940)

研究方向: 种族问题如何在现代文明里被建构与再生产 相关论述

观点:

"The problem of the twentieth century is the problem of the color-line 20世纪的问题是 种族界线 的问题

近代科学并非单纯中立的“真理追求”，而是与帝国主义相互勾连:

the question as to how far differences of race-which show themselves chiefly in the colour of the skin and the texture of the hair-will hereafter be made the basis of denying to over half of the world the right of sharing to their utmost ability the opportunities and privileges of modern civilisation.“在多大程度上将成为剥夺世界上超过一半人口分享现代文明机遇与特权的依据 ('To the Nations of the World, 1900)

相关著作: 'Science and Empire'

考点2. Scientists clams

重要程度: ★★★★★
难易程度: ★★

4. Charles Darwin: *Origin of Species*物种起源 (1859) - “自然”的时空化 The temporalisation of 'nature'

The Descent of Man (1871) Part I, ch. VII 'The Extinction of Races'种族的灭绝

“When **civilised nations** come into contact with barbarians the struggle is short, except where a deadly climate gives its aid to the native race. Of the causes which lead to the victory of civilised nations, some are plain and simple, others complex and obscure. We can see that the cultivation of the land will be fatal in many **ways to savages**, for they cannot, or will not change their habits...”

当“文明国家”与“野蛮人”接触时，后者很快会走向灭绝。原因不仅是疾病或战争，还包括**生活方式与环境的冲突**：殖民者耕种、占领土地，导致“野蛮人”难以维持原有的生活方式 > 将种族差异自然化，好像这种“文明压倒野蛮”的趋势是进化规律的一部分，而非殖民暴力的结果

“With respect to the cause of this extraordinary state of things [of nearly all Tasmanian “natives” having died by the 1860s], Dr. Story remarked that **death followed the attempts** to civilise the the natives. “If left to themselves to roam undisturbed, they would **have reared more children**, and there would have been less mortality.” 承认殖民者“教化”的干预（强迫改变生活方式）加速了原住民死亡，而不是自然必然导致的 > 殖民文明的“同化努力”并没有带来进步，而是导致更高的死亡率和文化消亡

考点2. Scientists clams

重要程度: ★★★★★
难易程度: ★★

3. W. E. B. DuBois (1868-1963) - *Dusk of Dawn* (1940): 'Science and Empire'

观点:

- “My vision was becoming clearer. The Negro problem was in my mind **a matter of systematic investigation and intelligent understanding**.将“黑人问题”视为 需要系统调查和理性理解的对象，而不是道德恐慌或刻板印象下的偏见议题
 - The world was thinking wrong about race, because **it did not know**. The ultimate evil was stupidity.” 无知才是导致种族歧视的根本恶
- 对其他著作研究: “*the Philadelphia negro...* revealed the Negro group as a symptom, not cause; as a **striving, palpitating group**, and not an inert, sick body of crime; as **a long historic development** and **not a transient occurrence**.”黑人群体不是“犯罪的病灶”，而是“历史发展的产物”，一个 奋斗、跳动的群体 > 去病理化、去道德化
- 科学的局限与主观性: [The student] "must ever tremble lest some personal bias, some moral conviction or some unconscious trend of thought due to previous training, has to a degree distorted the picture in his view.研究者必须时刻警惕自身的偏见、道德信念、受过的教育可能会“扭曲”观察

考点2. Scientists claims

重要程度: ★★★★★

难易程度: ★★

3. W. E. B. DuBois (1868-1963) - *Dusk of Dawn* (1940): 'Science and Empire'

观点:

- 科学的局限与主观性:

Convictions on all great matters of **human interest** ... will enter to some extent into the most cold-blooded scientific research as a disturbing factor."科学研究不可避免会受到价值观的影响, 尤其在涉及 **人类事务**

对比: DuBois's scientific **work against** the **notion of 'retrogression'** “退化论”

背景: 19-20世纪 “退化论”: Sociological and anthropometric studies to refute belief in Blacks' mental and physical inferiority, claims of degeneration and 'the black race dying out' 黑人天生劣等, 在文明竞争中注定消亡

◆ Du Bois对“科学冷静客观性”的困境

- "Two considerations thereafter broke into my work and eventually disrupted it: first, one could not be a calm, cool, and detached **scientist**一方面, 我希望保持一个冷静客观的科学家身份
- While Negroes were lynched, murdered, and starved; and secondly, there was no such definite demand for scientific work of the sort I was doing.“但另一方面, 当我看到黑人被私刑、谋杀、饥饿时, 我无法继续做一个超然的观察者》科学并不是“中立的求真”, 而是受到权力与制度性忽视的限制

考点2. Scientists clams

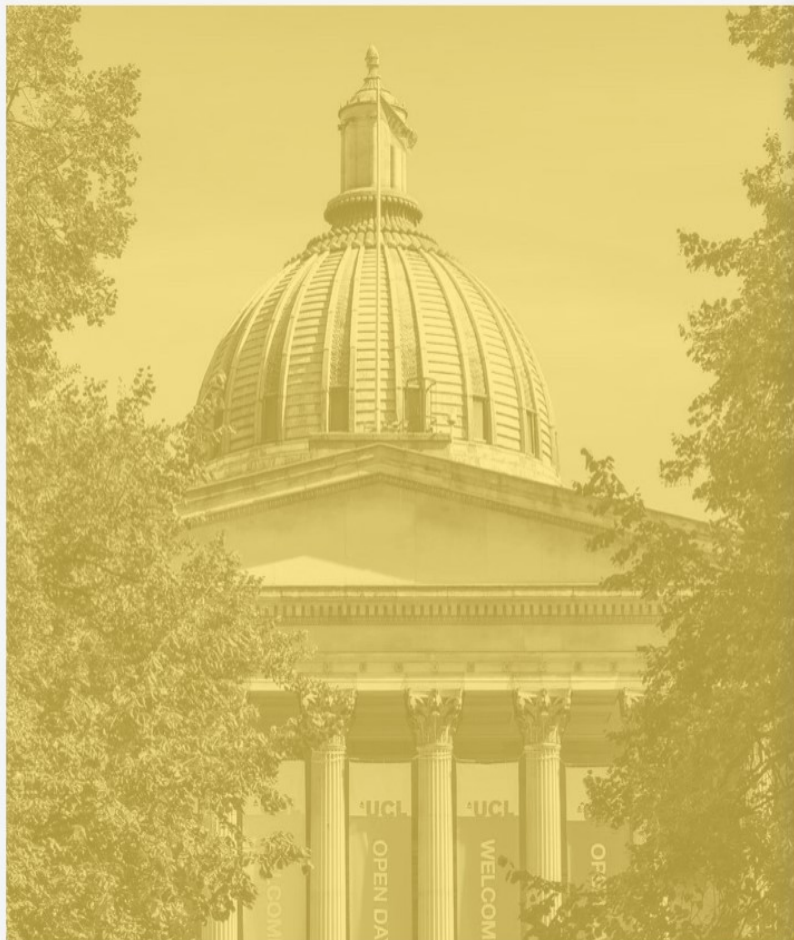

重要程度: ★★ ★

难易程度: ★ ★

3. W. E. B. DuBois (1868-1963)

关联: 客观性文化Cultures of objectivity: **the is/ought distinction** as a condition of scientific legitimacy in the 20th century 20世纪科学合法性的条件

"The is/ought distinction was to be institutionalised in the modern scientific role as a condition of its political legitimacy."在现代科学角色中被制度化, 成为其政治合法性的条件

重难点总结

重难点总结

W3: Facts and norms

1. Visions of nature

1. Historical change in visions of nature.
2. The virtuous scientist
3. None of scientists' business

2. Scientists claims

1. Max Weber
2. Albert Einstein
3. W. E. B. DuBois
4. Charles Darwin
